

What the hell is the FCC doing to maintain media credibility? I recently noticed that Sinclair network is planning on preempting next week's regular programming in order to promote a right-wing republican political commercial. I also realize that many Senators and members of Congress have already petitioned for the FCC to step in and do something.

What the hell is going on? Are we suddenly in a communist country? I demand that the FCC do the job it was supposed to do to preserve our rights and require objectivity in the media.... The FCC is so willing to come down on pornography, obscenity and foul language and yet is unwilling to come down on threats to our democracy. This is unbelievable, and immoral.....shame on you guys....
